5	Modus Information system Deputed to Infosys Technologies LTD	Aug 2010 – May 2012	Software Test Consultant

Domain Knowledge:

- Leasing
- Banking

Project Details:

Solifi Software India PVT LTD (June 2016 – Till Date)

Product: Infolease

Description:

The asset finance industry with millions of assets and financed goods dependent on its reliability and flexibility with accuracy and stability at its core, Info Lease provides an amazing range of capabilities. Info Lease delivers sound leasing operations, rich functionality for lease and robust reporting which are all scalable to the needs of your organization including regulatory compliance.

A wealth of proven InfoLease modules for adding new functionality to your system including Loans, Floating Rate and Revolving Accounts, Support for international currencies and tax structures, Use of Open Database Compliant (ODBC) Relational Database Management System (RDBMS).

InfoLease is a highly extensible portfolio management solution. Its powerful web services leverage the same functionality and data in the web user interface to drive self-service, digital channels, and integration with external systems like CRMs and data warehouses. In contrast to basic APIs, Info Lease's web services are well documented and traceable, saving precious development hours when utilizing web services to build self-service portals or integrations - like a handy cheat sheet for speed and efficiency.

Modules Worked on:

- Contract maintenance-Key Financials
- Charges
- InfoLease reports.
- Account Receivables
- Floating rate.
- Vertex-O taxation
- Income and expense

Roles and Responsibilities:

- Reviewing, preparing, executing and documenting the test cases in Zephyr.
- Actively involved in developing, executing automation scripts through Selenium.
- Assigning the test scenarios to the team members based on their functional knowledge.
- Analyzing the test scripts for the failed scenarios in the nightly run and taking appropriate steps (raise Defect or work with developer to understand the cause for failure)
- Supporting the team through the Agile project lifecycle including requirements, development, testing/quality assurance and production release
- Involved in Agile Retrospection, sprint planning, Capacity Planning and coordinated individual and team testing throughout to ensure quality deliverables by the end of the sprint.
- Involved in driving demo for the sprint.
- Working with BA's for Identifying the different flows covering the maximum functionality of Infolease
- Preparing the dataset for each of the flows.
- Weekly and monthly status reporting
