Mobile No. 7358248823

### / WORK EXPERIENCE

#### >> Software Engineer

Fork Technologies | 2021 to present

- > Worked on a project which was used to display 3D models of products on e-commerce websites
- > Used Three.js for 3D model management
- > Worked primarily with React hooks to handle side effects, add state, memoize, etc.
- > Added UI components to the experience such as buttons and details
- > Used backend api calls to display details on UI
- > Worked with Redux for state management

#### >> Senior Associate

Wipro | 2019 to 2021

- > Worked on multiple projects to make UI changes
- > Created new UI components as per client requirements
- > Used React hooks to add state and fire events at component initial render
- > Made use of Redux and thunk for global state management and asynchronous calls to fetch data
- > Got to handle JSON data
- > Used Material UI and SASS as CSS framework for components

### / EDUCATION HISTORY

#### >> University Of Madras

M.Sc Geology

#### >> Presidency College

B.Sc Geology

### / PERSONAL PROJECTS

#### >> Covid-19 tracker

- > Displays the covid-19 affected patients data
- > Made use of public api for data
- > Used React Leaflet for displaying data on map
- > React charts were used to show data on point graph

Deployed link- <https://loving-northcutt-1c31a7.netlify.app>

#### >> PG Management App

- > Is a app to apply the backend technologies which ive been learning by myself
- > Used MERN stack to build app
- > allows user login and registration and jwt for validation
- > configured routes to perform CRUD operations
